

TRON THEATRE Main House

We are pleased to hear that you are proposing to stage a performance in the **Main House** at the Tron.

The following documents should provide you with the necessary information to prepare for your visit:

- Technical Information
- Technical Questionnaire
- Technical Specifications
- Lighting Rig Information
- Ground plans, sections and lighting rig plans

Documents available at <http://www.tron.co.uk/technical/spaces>

We ask that you fill the questionnaire in and return it as soon as possible so we can agree schedules extra costs and staffing requirements.

Points to note:

In order that we can support you efficiently, agree costs and staffing requirements, please provide us with a detailed **Production Schedule** stating dates, times and activities for your production no less than two weeks before your get-in.

Setting Line/Fire Path -

The setting line designates the statutory fire path for the auditorium. The setting line is 1.2 meters from the bottom of the auditorium stairs. Please refer to our ground plan and if in doubt please contact us.

Tallescope –

Please note that due to HSE Legislation the tallescope can no longer be moved whilst occupied unless **all 4 outriggers are used**. This will increase the staffing and time required for focusing, you will need to factor this into your schedule.

Pre-rigging –

Pre-rigs are only possible when venue programming allows and through discussion with the Production Dept. There is a charge for a pre rig, which allows for approx a 5hr rig with minimum of 2 technicians. The pre-rig will only be available as long as a plan is received at least **one full week in advance of the pre-rig date.** **If you do not pay for a pre-rig please note that you will need to allow for adequate time and personnel to rig lx on your get-in day and this is likely to incur additional charges.**

Please be aware that the Tron is a very busy venue and there will likely be other companies performing at the same time and sharing the backstage facilities.

Finally, should you require any further information, or have any other queries regarding your visit to the Tron, please do not hesitate to contact us.

We look forward to receiving your completed questionnaire and Production schedule and hope to make your stay at the Tron a happy one.

TRON THEATRE – Main House

Technical Information

Updated 10/05/2017

Staffing

All Visiting Companies **MUST** provide at least **one competent Technician** and **one Stage Manager** to liaise with the Tron Technical staff prior to their get-in and to oversee their technical & stage requirements on the day of the get-in and to run their show and get-out.

The visiting Stage Manager will also be responsible for the Health & Safety of their company and will be given a short Health & Safety Induction on their arrival.

The production depts working week is Mon - Sat, Sunday being the dept day off. No technical work will be carried out on a Sunday unless by prior agreement with the Tron's Production Manager and will incur additional costs.

Get-in day

The Tron will provide two technicians to assist with the get-in and technical requirements between the hours of **9am and 6pm** (two 4hr sessions). Thereafter there will be one technician provided for each show call. (Please note this will not necessarily be the same technician for every call unless by prior agreement with the Technical Manager)

If required the Tron technician will operate **either** lights **or** sound. If you require us to operate your show please allow **ADEQUATE TIME** for lighting/technical rehearsal. If an additional member of staff is requested this will be charged to the company.

One hour lunch and dinner breaks must be observed, though we can organize split lunch breaks if forewarned. A charge will be made for missed meal breaks and any hours worked after 11pm.

Subsequent days

Any additional sessions required, i.e. for extra rehearsals or additional technical work will be charged to the company. For costs of charges contact the Tron's Production Manager.

Get outs

The Tron will provide one technician to oversee the get-out.

Please note it will be at the discretion of the Tron Production Manager whether extra Tron staff is necessary for the get-out due to the size or nature of the production. If extra staff is deemed necessary that charge will be passed onto the company. The get-out will start directly after the final performance. Work after 11pm will be charged at double time for Tron Technicians. Vans can be parked outside the get-in from 6pm.

Pre-rigging

Pre-rigs are only possible when venue programming allows and through discussion with the Production Dept. There is a charge for a pre rig, which allows for approx a 5hr rig with minimum of 2 technicians. The pre-rig will only be available as long as a plan is received at least **one full week in advance of the pre-rig date.**

If you do not pay for a pre-rig please note that you will need to allow for adequate time and personnel to rig lx on your get-in day and this is likely to incur additional charges.

Please also note our change of use of tallelescope – note on page 1.

TRON THEATRE – Main House

Technical Information

Updated 10/05/2017

Front Row Seating

Row A - the front row sits on stage level and is, when necessary removable completely or in sections of two seats. This row is used to accommodate wheelchairs and will not be removed unless the Visiting Company requires the extra stage depth due to the size of the set or for performance needs i.e. some dance pieces. The Box Office requires this information as soon as the contract is agreed in order to put your show on sale.

Please inform the Production Manager whether you wish Row A in or out.

Sound Position

Sound is operated from the control room (the windows are removable). However, for some musical pieces or gigs there are two available positions within the auditorium from which sound can be operated (please see the seating plan). This has implications for the Box Office who need to be informed in order to take the seats off sale. Please notify the Tron's Production Manager immediately. If the seats have been sold **no change** will be permitted. Any amplification or sound levels used in the production will be monitored and determined by the Tron Theatre.

Get-in

The dock door is situated in Parnie Street, with sliding wooden dock doors 2500mm wide x 2400mm high. Access to the Theatre via inner dock doors 2200mm wide x 2400mm high.

Parking

Parnie Street is a no parking zone except for after 6pm. The nearest reasonably priced parking is King Street Car Park - which is an open car park and able to take large vehicles.

Filming

Should the Visiting Company wish to film their production for archive purposes they will be responsible for giving notice to the Box Office Manager and the Production Manager as soon as the date of filming is known and no later than seven working days prior to filming. Box Office will block off seats, subject to availability. There may be a potential cost for this depending on the terms of the contract. If the Manager is not informed within the time stated the filming may be prohibited.

Health & Safety

The key components of the Tron's Health and Safety Policy are displayed in the Green Room and it is the responsibility of all company members to read this documentation, particularly the section on Fire Evacuation procedures. The Tron's full H&S Policy is kept in the General Manager's office.

First Aid boxes are located in the Box Office, Administration, Theatre Get-In, Bar and Kitchen.

Security Passes

A list of all company members is required before the day of arrival; please also email a list to khaliq.ahmed@tron.co.uk so security passes can be prepared. These passes also allow for certain discounts in the café.

Security

Please note it is the responsibility of each individual company member to ensure the security of his/her own personal belongings.

Dressing Rooms

Dressing rooms must be vacated Fifteen minutes after the end of the performance.

Smoking

In accordance with current Scottish law there is NO SMOKING in any area of the Tron including the performance areas.

Fire Safety

In the interests of fire safety, it is the responsibility of the incoming Stage Manager to ensure that all members of the company are aware of emergency evacuation procedure in liaison with the Tron Stage Manager. The Company must nominate an individual who will ensure that all members are accounted for in the event of an emergency evacuation.

The fire alarm consists of a siren and verbal announcement which automatically activates the venues working lights.

The Visiting Company shall ensure that all scenery, props, etc. used in the production shall meet all fire regulations and shall abide by any instructions given by the Fire Officer.

P.A.T.

The Visiting Company must make sure that all portable electrical equipment brought onto the premises has a valid test certificate and complies with standards as set out in all current legislation. The Technical Dept reserves the right to decline the use of or to test any such equipment and to charge the Visiting Company for the cost of each test. In the event of any item of equipment failing a test, the Technical Dept reserves the right to require the Company to remove or replace the item at their expense. There is a charge for PAT testing please contact us for prices.

Please contact us if you require further information or clarification.
